MOHAMMED MINHAJ MAHMOOD

Computer Science Graduate | Data, Research & Business Automation

Hyderabad, India • Open to Relocate • +91 9908597337 • minhajmuhammad229@gmail.com• LinkedIn • GitHub • Portfolio

SUMMARY

Computer Science (Data Science) graduate with a genuine interest in technology: understanding problems deeply through data analysis, applied research, and building automation for real businesses. Combines hands-on technical project work with real entrepreneurial experience running a growth-focused venture for local businesses, and is comfortable moving between analytical and business-facing work.

EXPERIENCE

Founder, Alif Growth Media | March 2026 – Present | Alif Grwoth Media

- Built a structured growth-service process (Understand → Design → Automate → Grow) covering digital marketing, web design, and customer-communication automation for local businesses.
- Delivered real client engagements: SAFA Fresh, DT Interiors, Sumera Collections. Currently fee-for-service per project, while designing toward a profit-share model as the business matures.

PROJECTS

Customer Segmentation & Churn Prediction (2026) | GitHub | Live Dashboard

- Explored whether customers could be usefully segmented by behaviour, and whether churn could be predicted early enough and explained clearly enough to be useful, using a public telecom dataset (7,043 records).
- Built RFM-based K-Means segmentation (5 customer segments) and an XGBoost churn model (AUC 0.89), correcting for class imbalance with SMOTE.
- Used SHAP to identify and explain top churn drivers (contract type, tenure, service type) so the model's output is a reason, not just a score. Deployed as an interactive Streamlit dashboard.

Vision-Based Terrain Classification (Academic team project, 2025–2026) | GitHub | Live Dashboard

- Team project classifying terrain type (Desert, Forest, Mountain, Plains) from images, using MobileNetV2 for feature extraction with classical classifiers. The choice was deliberate: lightweight enough to eventually run on constrained hardware like drones or rovers.
- My role: data cleaning and preprocessing pipeline, plus the Streamlit frontend and dashboard for the deployed demo.

SKILLS

Programming: Python, SQL
Data & ML: Pandas, NumPy, Scikit-learn, XGBoost, SHAP, Streamlit
Business & Strategy: Market Research, Requirement Analysis, Growth Strategy
Tools: Git, GitHub, Power BI, SAP Datasphere

CERTIFICATIONS

Deloitte Australia: Data Analytics Job Simulation, Forage (certificate)
SAP: Exploring SAP Datasphere (certificate)
Scrum Fundamentals Certified (SFC™), SCRUMstudy (certificate)
Data Analysis with Python, IBM SkillsBuild (certificate)

EDUCATION

B.Tech, Computer Science Engineering (Data Science), Vaagdevi College of Engineering, JNTUH, Warangal (2022–2026)

Languages: English (Professional) · Telugu (Native) · Hindi (Conversational) · Urdu (Native)
